

Great New Product from SKLZ Golf

Just in time for the holiday season, we have a great new product for the golfer on your list! The Golf SimStix is a true feel club for golf gaming.

Bring the true course or range experience to your home with Golf SimStix. SimStix is recommended for use with Tiger Woods PGA Tour Series or other simulation software to get real-time swing feedback and improve your game. The authentic golf grip and steel shaft help you to get real club weight and feel.

- Recommended use with Tiger Woods PGA Tour
- Works with Nintendo Wii Remote with Motion Plus and Wii Remote Plus
- 23.5 inches long playing weight of 15.5 oz
- Includes SimStix, wrist strap, StimStix spacer, usage and set up instructions
- Wii remote sold separately

Orders placed for these products for shipment before December 16 2010 will be invoiced at the holiday prices noted below.

MSRP: \$49.99

See what other golfers are saying about the SimStix

"I have no idea who the rocket scientist at Wii was that decided to make a golf game with a user interface that looks and feels like a channel changer - especially since the game itself is so realistic. Anyway, the Chicken Stick is a game changer in that you have a real golf grip and can do a real golf swing. Im 6'4 and 250 lbs and I whip the club very hard. The Wii device is very secure in the Chicken Stick so after you use it for a while you get very comfortable with a full swing. The grip is a real golf grip and the weighting is such that you get a real golf club feel. It really is a fantastic upgrade from the standard channel changer wii device. A real game changer."
